Introduction

The *Instant Search Embeddable Form* is an interactive car search widget which can be placed on your own website. It allows your members to begin their search for new and pre-owned cars without leaving your website.

From a technical standpoint, the *Instant Search Embeddable Form* is a JavaScript based widget which relies on CORS to communicate with your GrooveCar website.

The easy-to-use script builds DOM on your web page, giving the ease of use of an `iframe` (just a few lines of markup), with none of the drawbacks.

Embedding the Widget

To display the form on a page, simply insert the following `script` tag inside of a container:

```
<div id="gcSearch" style="width: 300px;">
  <script src="https://SUBDOMAIN.groovecar.com/select-embed/ui/js/select-embed.js"></script>
</div>
```

Replace `SUBDOMAIN` in the URL of the script with your own GrooveCar sub-domain.

The widget will fill out the width of its parent, and can be as wide or narrow as you like. We find 300 pixels wide to be aesthetically pleasing and usable, and around 275 pixels wide is near the minimum width. Be aware that the height of the widget is somewhat variable depending on whether or not the user is searching for new or pre-owned cars.

Styling the Widget

By default, the *Instant Search Embeddable Form* will be styled using the same colors and fonts your GrooveCar site uses.

However, since the widget is a first-class citizen of your own web page and not an `iframe`, you're free to use CSS to style it in any way you see fit. All CSS classes in the form's DOM are prefixed with `sef_`, and IDs are prefixed with `id_sef_`.

If you have any questions, please feel free to reach out to us for support.

Example of embedded widget

Loans	As Low As
New Auto	2.24%
Used Auto	3.24%
Home Equity	3.99%
1st Mortgage	3.74%

Example of embedded widget on a credit unions home page
